

MEDICAL STUDENT AND RESIDENT ROTATIONS

Dr. Fuller is a Clinical Assistant Professor at both NEOMED and Ohio University. As part of this appointment, she spends several months each year instructing medical students and residents. We encourage you to allow the students and residents to participate in your care as this instruction is an important part of their education.

During your visit, the doctor may discuss your diagnosis with the student/resident, answer questions, and depending on the experience level of the student/resident, allow them to assist or complete procedure(s).

- I approve having a student observing and assisting the physician.
- I approve having a student observing only.
- I do not wish to have a student in the room.
